Programing Languages

Java, PHP, Python

App Technologies

XML, Java.

Web Technologies

HTML, CSS, JavaScript.

Database Management

MySQL, SQLite.

Tools

Visual Studio code, intellij Idea, git, GitHub.

Core Concepts

OOP, Debugging, MVC, Problem Solving

PROJECTS

Personal Portfolio Website [🔗](#)

Built a fully responsive personal portfolio website showcasing my projects, skills, and education. Designed modular sections with smooth navigation and JavaScript-based UI effects for better user experience. Integrated GitHub project links and developed backend components using PHP + MySQL. Optimized for mobile-first responsiveness to ensure clean viewing across all devices.

Mumbai Tourism Application [🔗](#)

Created a tourism guide Android app for discovering Mumbai attractions with detailed information and clean UI. Integrated map/navigation to guide users from their location to tourist spots.

Footwear Website [🔗](#)

Designed a dynamic footwear e-commerce platform featuring product catalog, cart management, and full CRUD operations using PHP and MySQL. Integrated **Razorpay** for secure payment processing. Added **SMTP email notifications** for user messages and order updates, along with responsive UI and interactive JavaScript features.

OTHER SKILLS

Git & Github

Managed version control for Android projects, and web projects, including branching and pull requests for collaborative development.

Xampp

Set up local development environments for testing PHP-based admin dashboards and MySQL database interactions.

SMTP Email Integration

Integrated **SMTP email functionality** to send automated messages/notifications to users using PHPMailer.

Google Maps API Integration

Implemented **Google Maps API** to display interactive maps with location markers and navigation routes.
